COMPLETED PROJECTS

At the close of 2012, several projects were completed:

- Ebaugh Chemistry Laboratory
Denison University (see insert)
- Anomatic Corporation
New Albany, OH
- Rolls Royce Energy Systems Headquarters
Mount Vernon, OH
- Licking County Chamber of Commerce
Newark, OH
- OSU Driving Simulator,
Columbus, OH
- Granville Historical Society Museum
- Newark High School
- Nestle Product Technology Center
Marysville, OH

In September, Denison University, in Granville, Ohio was advised that their newly renovated Ebaugh Chemistry Laboratory was certified as LEED Gold. The design team for this project was JBA Architects, Research Facilities Design, Jezerinac Geers Engineering, Prater Engineering, EMH&T, and Heapy Engineering. The General Contractor/CM at-risk for this project was Lincoln Construction.

The revamped Ebaugh—which now includes an additional 19,000 square feet, classrooms that encourage hands-on, experiential learning, and research space for faculty in the chemistry and biochemistry department—was built to reuse space and building materials from the original labs built back in 1966. (taken from Denison University's The DEN story "Ebaugh's Golden")

"We're setting a benchmark for other colleges," Sonya McKay, associate professor and project shepherd for the \$14.5 million renovation, told The DEN last August. "Ebaugh is the intersection of architecture and education. Everything is designed to inspire."

Mark Keith, RA
- **Marketing & Design**
Laura Hunt, AIA
- **Interior Design**
Karen Collins
- **Production**
Brian Koker
Ryan Gallinger
Tim Scheck
- **Corporate Accountant**
Ivy Soter

UNDER CONSTRUCTION

Continuing into the new year, we have several projects under way!

- Hebron Fire Dept. has expanded their station to include 6 bunk rooms, large dayroom, kitchen, classroom and offices
- The congregation at Prince of Peace Lutheran Church in Columbus are getting excited about their new administration building complete with social hall.
- Newark City Schools offices will be moving into a newly renovated elementary school building
- OSU CEMAS (Center for Electron Microscopy Analysis) plan to move into their new facility in March
- Licking County Humane Society will soon have a new place for dogs and cats to find new homes.

ON THE BOARDS

Given the variety of projects that JBA is capable of handling, it's not a big surprise that we have several projects in the works!

Fanatics sports wear company will soon be moving into one of the unused facilities owned by Longaberger to use as warehouse and office space.

Once in awhile we take on a residential project. Currently we are working on a beautiful two story addition creating a spectacular Texas-style ranch house complete with exposed trusses, three

decks and plenty of windows for the homeowner to enjoy their country setting view.

Manitowoc, located in Cleveland, OH, is a large corporation that manufactures

commercial ovens. JBA is in the process of designing a new corporate marketing headquarters that will house a state of the art test kitchen.

Hebron New Life United Methodist Church is growing! And with growth comes the need to enlarge the place of meeting and worship. The new sanctuary will serve many purposes including worship center, basketball court, and fellowship hall.

MEET OUR STAFF - Q&A with Interior Designer Karen Collins

Would you describe yourself as a morning person or a night owl? *A reluctant morning person*

My favorite color is.... *constantly changing from day to day; project to project. (but I'm partial to bright red, tropical blue-greens, and orange!)*

What is your biggest guilty pleasure? *I like to read romance novels – I'm sappy!*

Do you have any pet peeves? *When people don't use cruise control or turn signals*

If you could change one thing about yourself, what would it be? *I wish I could cook*

When you were a child, what did you want to be when you grew up? *a stewardess*

If you could go on vacation anywhere in

the world, where would it be? *Italy*

What was your first job? *Piercing ears at the mall*

If you could change one aspect of your personality, what would it be? *Think before speaking*

What would you consider to be a perfect day? *On vacation with my husband*

What is your all-time favorite movie? *Gone With the Wind (sappy!)*

Which do you like better, the summer or the winter? *Summer! I'm from the South and like warmth.*

Chocolate or vanilla? *I'm a Chocoholic*

If you could have dinner with anyone, living or dead, who would it be and why? *My ancestors; I love researching my family history*

What is your favorite song? *I love many types of music, but one that really moves me is Beethoven's 7th symphony 2nd movement*

What was your most embarrassing moment ever? *Falling off the stage during a junior-high band concert*

Do you have any role models? *My mom*

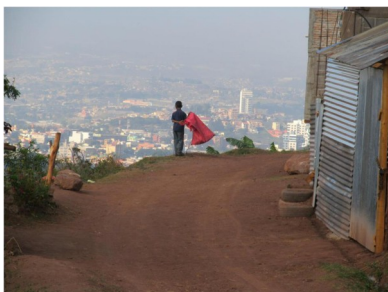

What has been the proudest moment of your life so far? *Having a project displayed by the International Association of Color Consultants in 2008 is pretty high up there!*

Karen earned her BFA in Interior Design from Virginia Commonwealth University

RECENT HAPPENINGS

Mr. Gallinger is out of the country this week.....

Ryan Gallinger, draftsman at JBA, and his two sons Noah and Eli are on a mission trip to Honduras to help build homes for the poor. His group left on January 12th and will return on January 19th. He is building with The Honduras Project and he attends Vineyard Grace Fellowship in Heath, Ohio. The ministry group has the goal of building 3 homes during their week in Honduras. JBA is proud of the sacrifice, commitment, and leadership that Ryan is modeling for all of us!

JBA celebrates 75 years!

2013 marks a milestone for JBA Architects. In 1938 Joseph Baker started his practice in Newark, Ohio. The firm has been in continuous operation since, making us one of the longest-lived practices in Central Ohio. While we are seasoned with the experience and stability you expect to find in a firm our age, we have the energy and motivation of a "young" firm. Give us a call and find out just how spry we are for a 75 year-old!
